

Data Science with AI | Capstone Program

Industrial Internship + Data Science Project Experience

Why Kizen offers Data Science with AI Capstone?

- Build practical data science skills through real-world projects and guided mentorship.
- Combine data science, AI and deployment into an end-to-end learning experience.
- Gain industry exposure through project execution, documentation and presentation.
- Develop a portfolio and professional readiness through hands-on capstone work.

What is Data Science with AI Capstone?

A project-driven programme designed to help learners become job-ready data science professionals. It combines Python, data handling, statistics, machine learning, deep learning, Generative AI, deployment and a final industry-style capstone with live mentorship.

Who can join Data Science with AI Capstone?

- Final-year students, pre-final-year students and recent graduates from BCA, B.Sc, B.Tech and MCA.
- Learners interested in Data Science, AI, analytics and real-world problem solving.
- Students with basic programming knowledge (Python preferred) who want project and industry exposure.

Data Science with AI Capstone Course Structure

1. DATA FOUNDATIONS	2. MACHINE LEARNING	3. AI & BIG DATA	4. CAPSTONE & DEPLOYMENT
• Business Problem Understanding • Python & SQL • Data Cleaning & Transformation • EDA & Visualization • Statistics & Hypothesis Testing	• Regression & Classification • Linear, Logistic & Tree Models • Random Forest & XGBoost • Model Evaluation • Hyperparameter Tuning	• Deep Learning • CNN / RNN • NLP & Transformers • Generative AI for Data Tasks • Big Data Basics	• Power BI / Tableau • Streamlit / APIs • Industry Project Execution • Documentation & Presentation • Portfolio & Career Readiness

CAREER OUTCOMES

- Data Scientist / Data Analyst
- Machine Learning / AI Engineer
- Business / Data Intelligence Professional
- AI & Analytics Project Professional

LEARNING OUTCOMES

- Analyse, clean and visualise real-world datasets.
- Build and evaluate machine learning and AI models.
- Develop dashboards and deploy practical solutions.
- Create a portfolio-ready industry capstone with professional documentation.

PROGRAMME VALUE

Real Industry Projects • Live Mentorship • End-to-End Project Experience • GitHub Portfolio • Industry Training Certificate • Professional Network & References • Career Support
