

AI JOB READY PROGRAM

Build AI Skills. Apply AI. Become Career-Ready.

Why Kizen offers AI Job Ready?

- Two practical pathways — build an AI career or become an AI-powered professional.
- Project-first learning across Machine Learning, Deep Learning, Generative AI, LLMs, automation and deployment.
- Hands-on learning through real tools, projects, workplace applications and career preparation.
- Designed to move learners from learning AI to building, applying and demonstrating AI skills.

What is AI Job Ready?

AI Job Ready is Kizen’s practical AI programme built around two pathways: **AI Career Track** for students, graduates and career starters, and **AI for Work** for working professionals. It combines hands-on learning, real-world projects, workplace application and career preparation.

Who can join AI Job Ready?

- Students, graduates, job seekers and career starters seeking careers in AI, ML and Generative AI.
- Working professionals from any domain who want to apply AI to productivity, automation, analysis and decision-making.
- Learners interested in practical AI; Python is preferred for the Career Track, while AI for Work requires no coding.

AI Job Ready Course Structure

1. AI FOUNDATIONS & TOOLS	2. AI CAREER TRACK	3. AI FOR WORK	4. PROJECTS & CAREER
• AI & GenAI Fundamentals • AI Tools & Prompting • Data & AI Workflows • Privacy & Responsible Use • Practical AI Applications	• Machine Learning & Data • Deep Learning & Computer Vision • NLP & Transformers • RAG & LLMs • Fine-Tuning, Deployment & MLOps	• AI Productivity • Work Automation • AI Data Analysis • Communication & Strategy • Domain AI & Custom Assistants	• Portfolio Projects • Real Work Capstone • GitHub & Documentation • Resume & LinkedIn • Mock Interviews & Career Guidance

Career Outcomes

- AI / Machine Learning Engineer
- Data Scientist / AI Analyst
- Generative AI / LLM Engineer
- AI-Powered Professional / Automation Specialist

Learning Outcomes

- Build practical AI solutions across Machine Learning, Deep Learning, Generative AI and LLM applications.
- Apply AI tools to automate, analyse and improve real workplace tasks.
- Create portfolio-ready projects and document work through GitHub and professional profiles.
- Develop interview readiness through project discussions, technical preparation and mock interviews.

Choose Your AI Path

AI CAREER TRACK	AI FOR WORK
8 Weeks • Optional 12-week format Students • Graduates • Job Seekers AI/ML + GenAI + Deployment Projects + Production Capstone	5 Weeks • 20 Hours Working Professionals Productivity + Automation + Domain AI Real Work Capstone

Career focus: AI/ML Engineer • Data Scientist • GenAI/LLM Engineer

Work focus: AI-enabled Professional • Automation • Role-specific AI

The Kizen AI Job Ready Journey

LEARN → BUILD → APPLY → DEPLOY → DOCUMENT → PRESENT → INTERVIEW → GET CAREER-READY

Programme Value

- Live instruction • Guided labs • Mentorship • Projects • Career preparation.
- AI Career Track: multi-project GitHub portfolio + production AI capstone.
- AI for Work: reusable AI workflows + real-work capstone with practical time-saving outcomes.
- Certificates recognise successful programme completion; placement assistance is career support, not a guaranteed job offer.
