

School AI Learning Programme

10-Day AI Discovery | 30-Day Applied AI Learning

Why Kizen offers School AI Learning?

- Build AI awareness, computational thinking and practical digital skills from an early stage.
- Age-appropriate pathways for Classes 5–8 and Classes 9–12.
- Hands-on activities, coding, projects, testing and responsible technology use.
- Flexible 10-day and 30-day formats designed around visible student outcomes.

What is School AI Learning?

Kizen's School AI Learning Programme introduces students to artificial intelligence through guided activities, practical tools, coding and project development. The 10-day option builds curiosity and foundational skills through a guided mini-project, while the 30-day option provides deeper practice and a complete capstone project with testing, documentation and Demo Day.

Who can join School AI Learning?

- Classes 5–8 students exploring AI, logic, creative computing and interactive projects.
- Classes 9–12 students progressing into Python, data, machine learning and guided AI applications.
- Schools seeking a structured, practical AI learning pathway with measurable project outcomes.

School AI Learning Course Structure

AI FOUNDATIONS	CREATIVE COMPUTING	APPLIED AI	PROJECT & SHOWCASE
• AI Around Us • Patterns & Algorithms • How Machines Learn • Data & Prediction • Responsible AI	• Scratch & Interactive Projects • Logic & Conditions • Problem Solving • Image Classification • Python Essentials*	• Data with Pandas* • Charts & Insights* • Machine Learning* • NLP / Computer Vision* • Generative AI*	• Problem Selection • Prototype & Build • Test & Improve • Documentation & Presentation • Demo Day & Certification

* Primarily emphasized in the Classes 9–12 applied pathway.

PROGRAMME OUTCOMES

- 10-Day: guided mini-project and presentation
- 30-Day: complete age-appropriate capstone and Demo Day
- Certificate of participation / project completion

LEARNING OUTCOMES

- Understand how AI uses data, patterns and instructions.
- Build age-appropriate AI projects with guidance.
- Test, explain and improve outputs while recognising limitations.
- Practise privacy, verification and responsible technology use.

10-DAY AI DISCOVERY	30-DAY APPLIED AI
Awareness • Activities • Guided Mini-Project • Presentation	Foundations • Practice • Capstone • Testing • Demo Day
