

FOR WORKING PROFESSIONALS & CORPORATE TEAMS

AI for Corporate World.

Your team already uses AI. Train them to use it well.

A practical, hands-on programme that teaches professionals to apply AI to everyday work — productivity, automation, data analysis, communication, strategy and role-specific AI. Workplace adoption, not model building.

No coding required

Live interactive sessions

Capstone with measured ROI

Programme Snapshot

AUDIENCE

Working professionals from any domain

PREREQUISITES

Basic computer knowledge; no coding required

DELIVERY

Offline / Online / Hybrid · live interactive sessions

APPROACH

Demonstration › Guided Practice › Workplace Application

FINAL OUTPUT

Capstone Showcase — an automated workplace project with measured time savings

CERTIFICATION

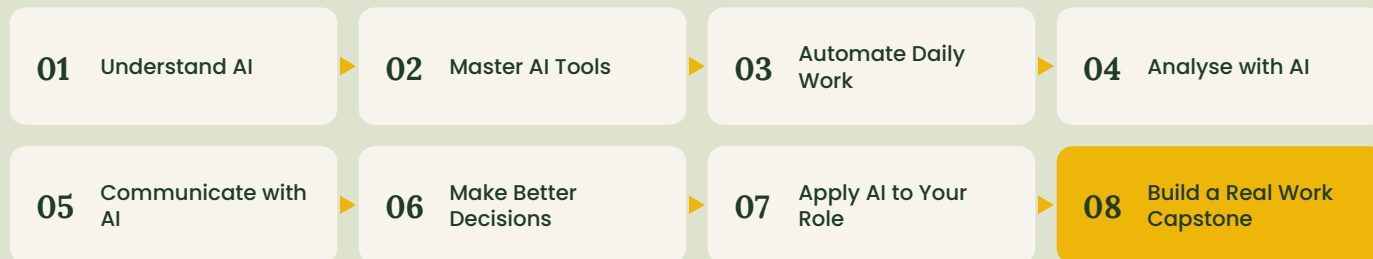

AI for Corporate World Programme Certificate

BATCH MODELS

- Individual professionals
- Team / group batches
- Weekend batches
- Corporate in-house batches at your office

Tailored to your team's roles, tools and workflows.

Programme Design Principle

Week-by-Week Curriculum

Five weeks, each ending with a deliverable you take straight back to work.

01 WEEK

AI Fundamentals + Daily AI Tools

- What is AI & GenAI; real-world business use cases; AI tools landscape; corporate data privacy & security
- ChatGPT, Gemini, Copilot, Claude, Perplexity, Notion AI, GrammarlyGO, Canva AI, DALL-E 3, Runway
- Structured prompting: Context, Persona, Constraints, Format
- Real-time competitive and industry research with Perplexity AI

DELIVERABLE

Personal AI Opportunity Audit + Prompt Library with 15+ custom templates

02 WEEK

Daily Work Automation

- Email and document automation
- AI in Excel and Google Sheets; formula generation; Python in Excel
- No-code automation with Zapier and Make.com
- Generate formulas, regex patterns and data scripts with AI
- Build a 3-step workflow: email inputs › structured tracking sheets

DELIVERABLE

Automated Lead / Task Pipeline via Zapier / Make

03 WEEK

Data Analysis + Executive Communication

- Code Interpreter / Advanced Data Analysis; automated insights, trend detection and executive summaries
- AI-powered dashboards; high-impact writing, editing and rewriting
- Meeting transcription and action items using Otter.ai / Fireflies
- AI presentation workflows using Gamma AI / Tome
- Analyse raw sales or operational data; run sentiment / categorisation on feedback datasets

DELIVERABLE

1-Page AI Executive Data Report + Executive Communications Suite (pitch deck, action summary, memo)

04 WEEK

Decision Making + Domain AI

- Market research and competitor analysis
- Strategic planning, scenario modelling and SWOT analysis
- Automated competitor intelligence using live web-search agents
- Simulate client objections and risk scenarios with custom persona prompts
- Build a domain-tailored Custom GPT / Gem with specialised reference files

DELIVERABLE

Strategic Market Analysis Deck + Custom Domain Assistant

05 WEEK

Real Work Capstone

- End-to-end workplace task automation; personal AI workflow integration
- Integrate custom prompts, spreadsheets and automated triggers into one continuous workflow
- Peer presentation, iteration and optimisation
- Measure and communicate practical time savings / ROI

DELIVERABLE

Final Capstone Showcase — live execution of an automated workplace project

Expected Outcomes

- 01** Faster execution of routine professional tasks
- 02** Reusable prompts and AI workflows for daily work
- 03** Practical experience with research, data, communication and automation tools
- 04** A role-specific Custom Domain Assistant
- 05** A demonstrable workplace capstone showing practical AI application and time savings

Assessment Framework

- **Participation**
Attendance and engagement in practical sessions
- **Module deliverables**
Opportunity Audit, Prompt Library, Automation Pipeline, Data Report, Communications Suite, Strategy / Domain outputs
- **Capstone**
Working end-to-end workplace workflow
- **Presentation**
Live execution, optimisation and explanation of measured time savings

Core Tooling Ecosystem

CATEGORY	PRIMARY TOOLS	WORKPLACE APPLICATION	LEVEL
LLM Engines	ChatGPT, Claude, Gemini, Copilot	Writing, drafting, code assistance, reasoning	Beginner › Intermediate
Web Research	Perplexity AI, Consensus	Real-time web intelligence, sourcing citations	Beginner
Workflow Automation	Zapier, Make.com	Cross-platform triggers: Email › Sheets › Slack	Intermediate
Data & Spreadsheets	Advanced Data Analysis, Rows, Formula Bot	Data cleanup, automated charting, formula generation	Beginner › Intermediate
Visual & Decks	Canva AI, Gamma.app, DALL-E 3	Slide decks, graphic assets, infographics	Beginner
Meeting Assistants	Otter.ai, Fireflies.ai	Audio transcription, action-item summaries	Beginner

Role-Specific AI Applications

Week 4 builds a Custom GPT / Gem tailored to each participant's own function.
