

CERTIFICATE PROGRAMME • TWO PATHWAYS

AI Job Ready.

Build AI Skills. Apply AI. Become Career-Ready.

Kizen's practical AI programme built around two pathways — an AI Career Track for students and career starters, and AI for Work for working professionals. Hands-on learning, real projects, workplace application and career preparation.

Project-first learning

ML · DL · GenAI · LLMs

Career preparation

Why Choose Kizen for AI Job Ready Programme?

01**Two practical pathways**

Build an AI career, or become an AI-powered professional in your current role.

02**Project-first learning**

Across Machine Learning, Deep Learning, Generative AI, LLMs, automation and deployment.

03**Real tools, real work**

Hands-on learning through real tools, projects, workplace applications and career prep.

04**Learn > Build > Demonstrate**

Designed to move you from learning AI to building, applying and demonstrating AI skills.

What is AI Job Ready?

AI Job Ready is Kizen's practical AI programme built around two pathways: the AI Career Track for students, graduates and career starters, and AI for Work for working professionals.

It combines hands-on learning, real-world projects, workplace application and career preparation — so you finish with work you can show, not just concepts you have heard.

WHO CAN JOIN?

- Students, graduates, job seekers and career starters seeking careers in AI, ML and Generative AI
- Working professionals from any domain who want to apply AI to productivity, automation, analysis and decision-making
- Learners interested in practical AI — Python is preferred for the Career Track; AI for Work requires no coding

AI Job Ready Course Structure

Shared foundations, then your chosen track, then projects and career preparation.

01 MODULE

AI Foundations & Tools

- AI & GenAI Fundamentals
- AI Tools & Prompting
- Data & AI Workflows
- Privacy & Responsible Use
- Practical AI Applications

02 MODULE

AI Career Track

- Machine Learning & Data
- Deep Learning & Computer Vision
- NLP & Transformers
- RAG & LLMs
- Fine-Tuning, Deployment & MLOps

03 MODULE

AI for Work

- AI Productivity
- Work Automation
- AI Data Analysis
- Communication & Strategy
- Domain AI & Custom Assistants

04 MODULE

Projects & Career

- Portfolio Projects
- Real Work Capstone
- GitHub & Documentation
- Resume & LinkedIn
- Mock Interviews & Career Guidance

Choose Your AI Path

PATHWAY 01

AI Career Track

8 Weeks · optional 12-week format

Students · Graduates · Job Seekers

- AI/ML + GenAI + Deployment
- Projects + Production Capstone
- Multi-project GitHub portfolio

Career focus: AI/ML Engineer · Data Scientist · GenAI/LLM Engineer

PATHWAY 02

AI for Work

5 Weeks · 20 Hours

Working Professionals · any domain

- Productivity + Automation + Domain AI
- Real Work Capstone
- Reusable AI workflows with measured time savings

Work focus: AI-enabled Professional · Automation · Role-specific AI

Career Outcomes

AI / Machine Learning Engineer

Data Scientist / AI Analyst

Generative AI / LLM Engineer

AI-Powered Professional / Automation Specialist

Learning Outcomes

- 01** Build practical AI solutions across Machine Learning, Deep Learning, Generative AI and LLM applications
- 02** Apply AI tools to automate, analyse and improve real workplace tasks
- 03** Create portfolio-ready projects and document work through GitHub and professional profiles
- 04** Develop interview readiness through project discussions, technical preparation and mock interviews

PROGRAMME VALUE

- Live instruction · guided labs · mentorship · projects · career preparation
- AI Career Track: multi-project GitHub portfolio + production AI capstone
- AI for Work: reusable AI workflows + real-work capstone with practical time-saving outcomes

The Kizen AI Job Ready Journey

CERTIFICATION & PLACEMENT SUPPORT

AI Job Ready Certificate

Certificates recognise successful programme completion. Placement assistance is career support — resume, LinkedIn, mock interviews and guidance — not a guaranteed job offer.
