

FOR SCHOOLS · CLASSES 5–8 AND 9–12 · 10-DAY AND 30-DAY OPTIONS

School AI Learning Programme

Practical, age-appropriate AI learning through activities, coding, projects and responsible technology use — delivered in your school, on your timetable.

10-Day or 30-Day

Classes 5–8 & 9–12

5 days/wk · 1–1.5 hrs

Demo Day + Certificate

Why Partner with Kizen?

1

End-to-end delivery

One partner for instruction, projects, assessment and certification — no in-house build required.

2

Practical learning

Students create demonstrable outputs — prototypes, notebooks and projects — not just attend lectures.

3

Flexible formats

Choose a 10-day introduction or a structured 30-day curriculum, fitted to the school timetable.

4

Showcase culture

Low setup using accessible tools, ending in a Demo Day that makes student achievement visible.

What is the School AI Programme?

Kizen offers two school-friendly AI formats: a **10-Day AI Discovery Programme** and a **30-Day Applied AI Learning Programme**. Both are designed for school students — not placement or career-sprint courses — with meaningful, realistic outcomes.

Two age-appropriate tracks: Classes 5–8 focus on AI foundations and creative computing (Scratch, Teachable Machine); Classes 9–12 focus on applied AI — Python, data, machine learning and guided application development.

PROGRAMME AT A GLANCE

FORMAT

10 or 30 days · 5 days per week · 1–1.5 hours per day · delivered in school

TEACHING STYLE

Demonstration, activity, guided practice, teamwork and presentation

FINAL OUTPUT

One guided mini-project (10-day) or one complete capstone project (30-day) per student team

SHOWCASE

Final Demo Day with demonstration, questions, feedback and certification

Choose Your Programme

A short practical introduction, or a structured project-based AI learning pathway.

OPTION A • 10 DAYS

AI Discovery Programme

Awareness, curiosity, basic skills and a guided mini-project

- Best for schools wanting a short practical introduction
- Classes 5–8: one guided interactive prototype
- Classes 9–12: one guided Python / AI mini-project
- Assessed on activities, participation, mini-project and presentation
- Certificate of participation and project completion

OPTION B • 30 DAYS

Applied AI Learning Programme

Deeper learning, coding practice, project development and a final capstone

- Best for schools wanting a structured AI learning pathway
- Classes 5–8: one complete age-appropriate capstone project
- Classes 9–12: one complete applied AI project with documentation
- Assessed on weekly outputs, project review, testing, documentation and Demo Day
- Certificate of applied AI project completion

What Students Build

Sample projects — every one is school-focused, age-appropriate and demonstrated on Demo Day.

CLASSES 5–8

AI foundations & creative computing

Smart Study Quiz

A Scratch-based quiz that asks questions, checks answers and gives feedback

Waste Sorting Classifier

A simple image classifier that identifies paper, plastic or other categories

CLASSES 9–12

Applied AI, Python, data & ML

School Data Explorer

A Python notebook with charts and insights from a sample attendance or marks dataset

School FAQ Assistant

A basic rule-based or guided chatbot answering common school questions

HOW STUDENTS BUILD THEIR PROJECT

- 1 Identify ▶
- 2 Plan ▶
- 3 Build ▶
- 4 Test
- 5 Improve ▶
- 6 Explain ▶
- 7 Present

Kizen provides instructors, curriculum, activity sheets, mentoring, weekly progress checks, the Demo Day and certificates. The school provides a coordinator, timetable support and classroom or computer access.
